

# FISHING SKIFF

Inshore Fishing Skiff | Pensacola Fishing | Boat Rental

## 6HP Outboard Motor

Go as far as the fishing takes you! With our included 4 gallon gas tank, you can motor around the bays and bayous for over 10 hours on a single tank. The internal tank gives you an extra 40 minutes of back up.

## The Center Rac

It acts like a center console. Use it to stand up and support yourself. It has two rod holders, one on either side and a foam tackle caddy to quickly trade out gear.

## The Sand Spear

Set up includes a sturdy 8 ft. sand spear. Get into any tight space you want and drop the spear through the attached sheath to stay in place. When you're back on the move, secure it to the deck with the mounted straps.

## The Seat and Rac

This is genius- the seat is a 5 gallon cooler which is held in place with the bucket rac.

## 12'6" Inflatable Micro Skiff

It's a skiff, it's motorized, it's outfitted and it's cool. The Bote 12'6" skiff is exclusive at Swell Ride and you can rent it for a full day or half day. The Bote skiff comes fully equipped for your day of battle on the water. At 12.6 feet long, 3 1/3 feet wide and 11 inches thick, this is a true stable boat perfect for the the waterways of Pensacola. The Bote Skiff is designed for all skill levels and is the only skiff fishing experience for rent in Pensacola.

Fill it with a bag of ice so you can use it for your snacks and drinks or use it as your fish catch for the day. The Bucket Rac holds the cooler in place and it's designed to hold 4 additional rods. This gives you options you to set up multiple poles for the day.

## The Paddle and Sheath

When you get to your desired fishing spot, turn off the motor and move into place with the adjustable paddle. It's conveniently mounted at the front of the vessel in a sheath that holds it in place for easy use and return .

The Aero Skiff is tuff as nails and built for adventure. All Bote Inflatables are made with "Drop Stitch" technology, meaning a cross section would show thousands of strands from top to bottom. This allows for multiple chambers and prevents over inflation. If by chance you ran into a spike, it wouldn't sink because other chambers would remain inflated.

- 1) Half day (4 hours) and full day (8 hours) rentals available
